Subject: Detectable automatic braking device to save human lives under patent applications no. 10/725,226 and no. 11/982,774, for licensing contracts to automobile makers of General Motor Corp, Ford Motor Company, Daimler Chrysler..

Office of Independent Inventor Programs
United States Patent and Trademark Office
Mail Stop Box 24
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Mr. Director,

Further to my letter of August 25, 2009.

I am soliciting a help of Mr. Director to interfere the situation with the above automobile makers to realize contracts fairly with the inventor so that the invention devices are to be put into practice soonest to save 42,500 Americans killed in traffic accidents yearly, which concerns millions of Americans who drive as safeguards to defend themselves from traffic accidents.

I expect a help of Mr. Director to interfere the situation with United States Patent related Department to accelerate issue of US patents of the cited patent applications at an early day so as for the inventor in the same boat to be able to defend to stop future victims on the roads of America.

Advantages: The invention device costs a making fee including the inventor's royalty to car owner, which will be reimbursed shortly by the reduction of automobile insurance premiums on the first year of the device equipped in an automobile as safeguard by means of bringing a coverage of such accident premiums down largely, car owner even takes continuous advantages at reduced premiums from second year on.

I highly appreciate to have your favorable response.

Respectfully,

Henri Duong
